A Guide to Temporal Networks (Series on Complexity Science)

Naoki Masuda, Renaud Lambiotte

A Guide to Temporal Networks (Series on Complexity Science) Naoki Masuda, Renaud Lambiotte

Network science offers a powerful language to represent and study complex systems composed of interacting elements from the Internet to social and biological systems. In its standard formulation, this framework relies on the assumption that the underlying topology is static, or changing very slowly as compared to dynamical processes taking place on it, e.g., epidemic spreading or navigation. Fuelled by the increasing availability of longitudinal networked data, recent empirical observations have shown that this assumption is not valid in a variety of situations. Instead, often the network itself presents rich temporal properties and new tools are required to properly describe and analyse their behaviour. A Guide to Temporal Networks presents recent theoretical and modelling progress in the emerging field of temporally varying networks, and provides connections between different areas of knowledge required to address this multi-disciplinary subject. After an introduction to key concepts on networks and stochastic dynamics, the authors guide the reader through a coherent selection of mathematical and computational tools for network dynamics. Perfect for students and professionals, this book is a gateway to an active field of research developing between the disciplines of applied mathematics, physics and computer science, with applications in others including social sciences, neuroscience and biology.

From reader reviews:

Josephine McIntire:

What do you think of book? It is just for students since they're still students or it for all people in the world, what best subject for that? Merely you can be answered for that issue above. Every person has several personality and hobby for each and every other. Don't to be pressured someone or something that they don't want do that. You must know how great and important the book A Guide to Temporal Networks (Series on Complexity Science). All type of book can you see on many methods. You can look for the internet resources or other social media.

William Walker:

Can you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you find out the inside because don't judge book by its protect may doesn't work is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside appearance likes. Maybe you answer can be A Guide to Temporal Networks (Series on Complexity Science) why because the wonderful cover that make you consider with regards to the content will not disappoint you. The inside or content is usually fantastic as the outside as well as cover. Your reading 6th sense will directly direct you to pick up this book.

Jess Cooke:

Don't be worry should you be afraid that this book will certainly filled the space in your house, you could have it in e-book technique, more simple and reachable. That A Guide to Temporal Networks (Series on Complexity Science) can give you a lot of pals because by you investigating this one book you have factor that they don't and make you actually more like an interesting person. This particular book can be one of one step for you to get success. This publication offer you information that maybe your friend doesn't know, by knowing more than additional make you to be great folks. So , why hesitate? Let us have A Guide to Temporal Networks (Series on Complexity Science).

Charlie Hartman:

A lot of reserve has printed but it is different. You can get it by internet on social media. You can choose the most effective book for you, science, witty, novel, or whatever through searching from it. It is identified as of book A Guide to Temporal Networks (Series on Complexity Science). You can include your knowledge by it. Without causing the printed book, it could possibly add your knowledge and make a person happier to read. It is most significant that, you must aware about book. It can bring you from one location to other place.
