Australia (Atlas of the Seven Continents)

Wendy Vierow

Australia (Atlas of the Seven Continents) Wendy Vierow

This seven-book series is a user's guide to locating Earth's continents and the countries of the world. Kids will learn that more than 200 million years ago, all continents began as part of Pangaea, a supercontinent that broke up to form seven continents. They will acquire map-reading skills by learning the directions in which longitude and latitude lines point, where the equator is, and what the prime meridian is. The final chapter in each book features a scientist, related to the continent, with specialties that range from dinosaurs to the study of volcanoes. Australia is the smallest continent on Earth. It is also part of a system of 2,000 islands in the Pacific islands called Oceania. This continent-country is also an island because it is surrounded by water. Australia boasts three great deserts and the largest monolith on Earth, Ayers rock, a place that to the Aboriginal people of Australia is the center of Earth. Off the northeastern coast of Australia is the Great Barrier Reef, a collection of coral reefs. At 1,250 mile long, it is the world's largest coral reef.
