**Ether space-time and cosmology: modern ether concepts, relativity and geometry** Michael C. Duffy, Joseph Levy

The aim of this first volume of papers is to examine the different paths by which the modern ether concept has been developed and to highlight the part it plays in major departments of 21st century physics. The evidence for its existence is reviewed, and it is hoped, widespread misconceptions concerning ether are corrected. It is anticipated that the emerging modern concept of ether will play a fundamental part in the development of 21st century physical science.
