Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) Frederic Magoules, Jie Pan, Fei Teng

As more and more data is generated at a faster-than-ever rate, processing large volumes of data is becoming a challenge for data analysis software. Addressing performance issues, **Cloud Computing: Data-Intensive Computing and Scheduling** explores the evolution of classical techniques and describes completely new methods and innovative algorithms. The book delineates many concepts, models, methods, algorithms, and software used in cloud computing.

After a general introduction to the field, the text covers resource management, including scheduling algorithms for real-time tasks and practical algorithms for user bidding and auctioneer pricing. It next explains approaches to data analytical query processing, including pre-computing, data indexing, and data partitioning. Applications of MapReduce, a new parallel programming model, are then presented. The authors also discuss how to optimize multiple group-by query processing and introduce a MapReduce real-time scheduling algorithm.

A useful reference for studying and using MapReduce and cloud computing platforms, this book presents various technologies that demonstrate how cloud computing can meet business requirements and serve as the infrastructure of multidimensional data analysis applications.

From reader reviews:

Charles Wilkerson:

Have you spare time for the day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity for spend your time. Any person spent their particular spare time to take a move, shopping, or went to often the Mall. How about open or perhaps read a book titled Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series)? Maybe it is for being best activity for you. You already know beside you can spend your time with your favorite's book, you can wiser than before. Do you agree with the opinion or you have different opinion?

Alberto Redden:

Spent a free time and energy to be fun activity to complete! A lot of people spent their down time with their family, or their friends. Usually they carrying out activity like watching television, about to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Will you something different to fill your personal free time/ holiday? Could possibly be reading a book is usually option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to test look for book, may be the book untitled Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) can be fine book to read. May be it can be best activity to you.

Shameka Smith:

Your reading sixth sense will not betray you, why because this Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) publication written by well-known writer who really knows well how to make book that could be understand by anyone who also read the book. Written inside good manner for you, still dripping wet every ideas and publishing skill only for eliminate your personal hunger then you still skepticism Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) as good book not only by the cover but also with the content. This is one book that can break don't assess book by its cover, so do you still needing yet another sixth sense to pick this!? Oh come on your looking at sixth sense already said so why you have to listening to an additional sixth sense.

Sharon Edwards:

Is it an individual who having spare time and then spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something totally new? This Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) can be the respond to, oh how comes? A book you know. You are and so out of date, spending your

extra time by reading in this brand new era is common not a geek activity. So what these books have than the others?
