## SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems) Pericles Antoniadis

Companies have long sought to integrate existing Information Systems (IS) in order to support existing and potentially new business processes spread throughout their “territories” and possibly to collaborating organizations. A variety of designs can be used to this end, ranging from rigid point-to-point electronic data interchange (EDI) interactions to “Web auctions”. By updating older technologies, such as “Internet-enabling” EDI-based systems, companies can make their IT systems available to internal or external customers; but the resulting systems have not proven to be flexible enough to meet business demands. A more flexible, standardized architecture is required to better support the connection of various applications and the sharing of data. Service-Oriented Architecture (SOA) is one such architecture. It unifies (“orchestrates”) business processes by structuring large applications as an ad-hoc collection of smaller modules called “Services”. These applications can be used by different groups of people both inside and outside the company, and new applications built from a mix of services (located in a global repository) exhibit greater agility and uniformity.

Thus, SOA is a design framework for realizing rapid and low-cost system development and improving total system quality. SOA uses the Web Services standards and technologies and is rapidly becoming a standard approach for enterprise information systems integration.

SOA adoption by enterprises has been identified as one of the highest business priorities by a recent Gartner study (Gartner 2007) and enterprises increasingly recognize the requirement for an increased “Service-orientation” and relevant comprehensive frameworks, which will not only help them position themselves and evaluate their SOA initiatives, but also guide them in achieving higher levels of SOA maturity. This in turn, will help enterprises acquire (and retain) competitive advantage over other players in the market who are not (using SOA and thus they are not) so flexibly adjusting themselves to address new business requirements.

This book proposes a new SOA Maturity Model (MM) using a Delphi-variant technique and this constitutes one of its distinguishing features because none of the relevant existing works utilized Delphi. Moreover, the fact that the proposed SOA MM supports inter-enterprise setups makes it even more distinct.

The newly proposed SOA MM is then used to help the participating organizations position themselves in respect to SOA (current status), guide them to achieve higher levels of SOA maturity, and anticipate their SOA maturity in five years’ time.

Furthermore, the “local” or “global” nature of the proposed SOA MM is investigated. This is checked firstly against selected expert panel participants and secondly against local business practitioners.

### **From reader reviews:**

#### **Carrie Wilson:**

What do you concerning book? It is not important to you? Or just adding material when you want something to explain what your own problem? How about your spare time? Or are you busy person? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? All people has many questions above. They should answer that question due to the fact just their can do that. It said that about guide. Book is familiar in each person. Yes, it is proper. Because start from on pre-school until university need this kind of SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems) to read.

#### **David Briggs:**

Information is provisions for people to get better life, information presently can get by anyone in everywhere. The information can be a information or any news even restricted. What people must be consider when those information which is in the former life are challenging to be find than now is taking seriously which one works to believe or which one often the resource are convinced. If you receive the unstable resource then you have it as your main information we will see huge disadvantage for you. All of those possibilities will not happen with you if you take SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems) as the daily resource information.

#### **Augusta Wilson:**

A lot of people always spent their free time to vacation or go to the outside with them family members or their friend. Do you know? Many a lot of people spent they will free time just watching TV, or playing video games all day long. If you wish to try to find a new activity that's look different you can read some sort of book. It is really fun for yourself. If you enjoy the book that you read you can spent the entire day to reading a e-book. The book SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems) it doesn't matter what good to read. There are a lot of those who recommended this book. These people were enjoying reading this book. If you did not have enough space to deliver this book you can buy the e-book. You can m0ore quickly to read this book out of your smart phone. The price is not very costly but this book features high quality.

#### **Virginia Shrader:**

Do you like reading a publication? Confuse to looking for your chosen book? Or your book has been rare? Why so many concern for the book? But any kind of people feel that they enjoy with regard to reading. Some people likes reading, not only science book but also novel and SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems) or even others sources were given information for you. After you know how the truly amazing a book, you feel want to read more and more. Science guide was created for teacher or maybe students especially. Those publications are helping

them to bring their knowledge. In additional case, beside science publication, any other book likes SOA Maturity Model: A Delphi-Derived Proposal for Inter-Enterprise Setups (SpringerBriefs in Information Systems) to make your spare time more colorful. Many types of book like this.
