Evaluating Learning Algorithms: A Classification Perspective Nathalie Japkowicz, Mohak Shah

The field of machine learning has matured to the point where many sophisticated learning approaches can be applied to practical applications. Thus it is of critical importance that researchers have the proper tools to evaluate learning approaches and understand the underlying issues. This book examines various aspects of the evaluation process with an emphasis on classification algorithms. The authors describe several techniques for classifier performance assessment, error estimation and resampling, obtaining statistical significance as well as selecting appropriate domains for evaluation. They also present a unified evaluation framework and highlight how different components of evaluation are both significantly interrelated and interdependent. The techniques presented in the book are illustrated using R and WEKA, facilitating better practical insight as well as implementation. Aimed at researchers in the theory and applications of machine learning, this book offers a solid basis for conducting performance evaluations of algorithms in practical settings.

From reader reviews:

Irene Gwyn:

Here thing why that Evaluating Learning Algorithms: A Classification Perspective are different and trustworthy to be yours. First of all examining a book is good nonetheless it depends in the content than it which is the content is as scrumptious as food or not. Evaluating Learning Algorithms: A Classification Perspective giving you information deeper since different ways, you can find any reserve out there but there is no publication that similar with Evaluating Learning Algorithms: A Classification Perspective. It gives you thrill reading through journey, its open up your eyes about the thing which happened in the world which is perhaps can be happened around you. It is possible to bring everywhere like in park, café, or even in your means home by train. Should you be having difficulties in bringing the published book maybe the form of Evaluating Learning Algorithms: A Classification Perspective in e-book can be your substitute.

Warren Johnson:

Playing with family in the park, coming to see the ocean world or hanging out with good friends is thing that usually you could have done when you have spare time, and then why you don't try matter that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Evaluating Learning Algorithms: A Classification Perspective, you may enjoy both. It is fine combination right, you still need to miss it? What kind of hang-out type is it? Oh occur its mind hangout men. What? Still don't obtain it, oh come on its named reading friends.

Daniel Bryant:

Do you have something that you want such as book? The guide lovers usually prefer to choose book like comic, small story and the biggest the first is novel. Now, why not hoping Evaluating Learning Algorithms: A Classification Perspective that give your fun preference will be satisfied by means of reading this book. Reading routine all over the world can be said as the method for people to know world better then how they react toward the world. It can't be mentioned constantly that reading routine only for the geeky man or woman but for all of you who wants to be success person. So , for every you who want to start reading as your good habit, you may pick Evaluating Learning Algorithms: A Classification Perspective become your own personal starter.

Laurie Cales:

You can spend your free time to see this book this book. This Evaluating Learning Algorithms: A Classification Perspective is simple to create you can read it in the recreation area, in the beach, train and soon. If you did not get much space to bring the actual printed book, you can buy the actual e-book. It is make you quicker to read it. You can save the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.
