Craig Johnson

Exploring Mathematics: Investigations with Functions (Jones & Bartlett Learning Series in Mathematics) Craig Johnson

Includes Access to Student Companion Website! Exploring Mathematics: Investigations with Functions is designed for one- or two- term mathematics courses for humanities and liberal arts majors. This unique ten-chapter text covers modern applications of mathematics in the liberal arts and situates the discipline within its rich and varied history. Exploring Mathematics draws on examples from the humanities, including how math is used in music and astronomy, and features perforated pages for easy study and review. The student-friendly writing style and informal approach demystifies the subject matter and offers an engaging and informative overview that will pique students' curiosity and desire to explore mathematics further. Organized around the use of algebraic functions, this text builds conceptual bridges between each chapter so that students develop advanced mathematical skills within a larger context. Unlike other texts that present mathematical topics as a disconnected set of rules and equations, Exploring Mathematics flows seamlessly from one subject to the next, situating each within its historical and cultural context. This text provides a unique opportunity to showcase the richness of mathematics as a foundation upon which to build understanding of many different phenomena. Students will come away with a solid knowledge base of the unifying ideas of mathematics and the ability to explain how mathematics helps us to better our society and understand the world around us. The Text's Objectives: The author chose the topics based on meeting the specific NCTM curriculum standards to: 1. Strengthen estimation and computational skills. 2. Utilize algebraic concepts. 3. Emphasize problem-solving and reasoning. 4. Emphasize pattern and relationship recognition. 5. Highlight importance of units in measurement. 6. Highlight importance of the notion of a mathematical function. 7. Display mathematical connections to other disciplines. Key Features: A full color, interactive design provides students with a safe environment to graph solutions, check off chapter objectives, and answer questions directly in their textbook Piques student interest in math by relating it to areas such as astronomy and music, found in Chapter 4, Astronomy and the Methods of Science and Chapter 9, Mathematics in Music and Cryptology Utilizes the concept of a function as a central theme, providing a common thread through chapters Presents an engaging, student-friendly style with problem sets that incorporate real-world applications and data An abundance of examples illustrating important applications are presented in each section, while four-color pictures and diagrams reinforce key concepts and increase student comprehension Every new, printed copy includes access to a student companion website, featuring a lab manual and student solutions manual

From reader reviews:

Norman Eiland:

What do you regarding book? It is not important to you? Or just adding material when you want something to explain what the one you have problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have free time? What did you do? Every individual has many questions above. They should answer that question because just their can do this. It said that about e-book. Book is familiar in each person. Yes, it is right. Because start from on guardería until university need this particular Exploring Mathematics: Investigations with Functions (Jones & Bartlett Learning Series in Mathematics) to read.

Diane Reid:

Reading can called brain hangout, why? Because when you find yourself reading a book particularly book entitled Exploring Mathematics: Investigations with Functions (Jones & Bartlett Learning Series in Mathematics) the mind will drift away trough every dimension, wandering in each aspect that maybe not known for but surely can become your mind friends. Imaging every word written in a guide then become one contact form conclusion and explanation that maybe you never get just before. The Exploring Mathematics: Investigations with Functions (Jones & Bartlett Learning Series in Mathematics) giving you one more experience more than blown away your thoughts but also giving you useful info for your better life in this particular era. So now let us present to you the relaxing pattern this is your body and mind will probably be pleased when you are finished examining it, like winning an activity. Do you want to try this extraordinary investing spare time activity?

Valerie Orbison:

Book is one of source of information. We can add our knowledge from it. Not only for students but also native or citizen require book to know the update information of year for you to year. As we know those textbooks have many advantages. Beside we add our knowledge, can bring us to around the world. Through the book Exploring Mathematics: Investigations with Functions (Jones & Bartlett Learning Series in Mathematics) we can take more advantage. Don't that you be creative people? To become creative person must like to read a book. Simply choose the best book that ideal with your aim. Don't possibly be doubt to change your life by this book Exploring Mathematics: Investigations with Functions (Jones & Bartlett Learning Series in Mathematics). You can more appealing than now.

Frances Wiggins:

Some individuals said that they feel fed up when they reading a e-book. They are directly felt the idea when they get a half regions of the book. You can choose typically the book Exploring Mathematics: Investigations with Functions (Jones & Bartlett Learning Series in Mathematics) to make your personal reading is interesting. Your own skill of reading talent is developing when you just like reading. Try to

choose straightforward book to make you enjoy to study it and mingle the feeling about book and examining especially. It is to be 1st opinion for you to like to start a book and examine it. Beside that the reserve Exploring Mathematics: Investigations with Functions (Jones & Bartlett Learning Series in Mathematics) can to be your new friend when you're sense alone and confuse in what must you're doing of their time.
