Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) N. S. Robins

The primary groundwater management issue in many countries today is pollution. This may derive from a point source, perhaps a leaking solvent store at a factory, or it may be diffuse, such as the threat posed by the use of agricultural fertilisers and pesticides. The key to understanding the transport of a pollutant from the ground surface or near surface into an aquifer is an understanding of recharge. In turn, this allows the vulnerability of aquifers to pollution to be classified and appropriate landzones to be defined. Land zonation of different classes of aquifer vulnerability is a valuable tool for management and planning. In this volume the recent developments within the interlinked areas of groundwater pollution, aquifer recharge and vulnerability are highlighted. The book provides an up-to-date description of the relationship between pollution, recharge and vulnerability set against the current groundwater protection policies of the UK and Republic of Ireland. It also provides keynote overviews for each topic.

Sustainable Groundwater Development (Geological Society Special Publication) - ISBN 1862390975
Climate Change and Groundwater - Special Publication no 288 - ISBN 1862392358

The Geological Society of London

Founded in 1807, the Geological Society of London is the oldest geological society in the world, and one of the largest publishers in the Earth sciences.

The Society publishes a wide range of high-quality peer-reviewed titles for academics and professionals working in the geosciences, and enjoys an enviable international reputation for the quality of its work.

The many areas in which we publish in include:

- Petroleum geology
- Tectonics, structural geology and geodynamics
- Stratigraphy, sedimentology and paleontology
- Volcanology, magmatic studies and geochemistry
- Remote sensing
- History of geology
- Regional geology guides

From reader reviews:

Linda Enders:

The book with title Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) possesses a lot of information that you can find out it. You can get a lot of gain after read this book. This specific book exist new understanding the information that exist in this reserve represented the condition of the world now. That is important to you to be aware of how the improvement of the world. This specific book will bring you throughout new era of the internationalization. You can read the e-book on your own smart phone, so you can read it anywhere you want.

Carol Castaneda:

Playing with family within a park, coming to see the ocean world or hanging out with buddies is thing that usually you will have done when you have spare time, in that case why you don't try factor that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130), you can enjoy both. It is very good combination right, you still need to miss it? What kind of hangout type is it? Oh can happen its mind hangout people. What? Still don't obtain it, oh come on its called reading friends.

Clinton Whitten:

This Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) is completely new way for you who has curiosity to look for some information mainly because it relief your hunger info. Getting deeper you into it getting knowledge more you know otherwise you who still having little bit of digest in reading this Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) can be the light food for yourself because the information inside that book is easy to get through anyone. These books develop itself in the form which can be reachable by anyone, that's why I mean in the e-book type. People who think that in guide form make them feel tired even dizzy this reserve is the answer. So there is absolutely no in reading a reserve especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss that! Just read this e-book variety for your better life and knowledge.

Jose German:

Don't be worry in case you are afraid that this book can filled the space in your house, you can have it in e-book technique, more simple and reachable. This kind of Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) can give you a lot of close friends because by you considering this one book you have point that they don't and make you actually more like an interesting person. This specific book can be one of a step for you to get success. This publication offer you information that maybe your friend doesn't understand, by knowing more than various other make you to be

great folks. So , why hesitate? Let me have Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130).
