Protein Folding and Metal Ions: Mechanisms, Biology and Disease

Protein Folding and Metal Ions: Mechanisms, Biology and Disease

The role of metal ions in protein folding and structure is a critical topic to a range of scientists in numerous fields, particularly those working in structural biology and bioinorganic chemistry, those studying protein folding and disease, and those involved in the molecular and cellular aspects of metals in biological systems.

Protein Folding and Metal Ions: Mechanisms, Biology and Disease presents the contributions of a cadre of international experts who offer a comprehensive exploration of this timely subject at the forefront of current research.

Divided into four sections, this volume:

- Provides case study examples of protein folding and stability studies in particular systems or proteins that comprise different metal ions of co-factors
- Reviews the proteins that shuttle metal ions in the cell to a particular target metalloprotein
- Illustrates how metal binding can be connected to pathological protein conformations in unrelated diseases, from cancer to protein deposition disorders such as Parkinson's disease
- Addresses protein redesign of metal-containing proteins by computational methods, folding simulation studies, and work on model peptides ? dissecting the relative energetic contribution of metals sites to protein folding and stability

Together, the 13 chapters in this text cogently describe the state of the science today, illuminate current challenges, propose future possibilities, and encourage further study in this area that offers much promise especially with regard to novel approaches to the treatment of some of the most challenging and tragic diseases.

From reader reviews:

Donna Jennings:

Do you have favorite book? When you have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each reserve has different aim as well as goal; it means that publication has different type. Some people really feel enjoy to spend their time for you to read a book. They are reading whatever they get because their hobby will be reading a book. Think about the person who don't like looking at a book? Sometime, person feel need book after they found difficult problem or maybe exercise. Well, probably you will require this Protein Folding and Metal Ions: Mechanisms, Biology and Disease.

Arturo Hasan:

Reading a book to become new life style in this year; every people loves to study a book. When you read a book you can get a lots of benefit. When you read guides, you can improve your knowledge, mainly because book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your research, you can read education books, but if you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, as well as soon. The Protein Folding and Metal Ions: Mechanisms, Biology and Disease provide you with a new experience in examining a book.

Nancy Mitchell:

This Protein Folding and Metal Ions: Mechanisms, Biology and Disease is brand new way for you who has intense curiosity to look for some information as it relief your hunger details. Getting deeper you into it getting knowledge more you know otherwise you who still having bit of digest in reading this Protein Folding and Metal Ions: Mechanisms, Biology and Disease can be the light food for you because the information inside this particular book is easy to get by simply anyone. These books build itself in the form which is reachable by anyone, yes I mean in the e-book contact form. People who think that in e-book form make them feel sleepy even dizzy this book is the answer. So there isn't any in reading a e-book especially this one. You can find actually looking for. It should be here for a person. So , don't miss this! Just read this e-book sort for your better life along with knowledge.

Anthony Bankston:

That publication can make you to feel relax. That book Protein Folding and Metal Ions: Mechanisms, Biology and Disease was vibrant and of course has pictures on there. As we know that book Protein Folding and Metal Ions: Mechanisms, Biology and Disease has many kinds or category. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and feel that you are the character on there. Therefore not at all of book are generally make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book for you and try to like reading this.
