An Open Letter to Selected Academics # 1: A Theses Introduction Peet (P.S.J.) Schutte

I found singularity. I found the point where to find singularity. I found singularity is not an idea by which science hides what they don't know but singularity controls every aspect of gravity and gravity controls every aspect of the Universe. In that I found four laws by which the Universe forms gravity. I managed to prove and explain four cosmic keys that build the Universe namely: The Titius Bode Law; The Lagrangian Points, The Roche limit and The Coanda Effect. Everything in nature in the Universe applies these phenomena in how space forms. The Titius Bode Law: forms the solar planetary layout and annihilates Newtonian dogma that the solar system forms in any way by applying the mass of the planets. The Lagrangian Points: holds material in position to form the rings around planets. The Roche limit removes the idea that stars and planets can collide or crash into each other. This explains amongst so many other things how the Tunguska event took place. The Coanda Effect is a ratio that movement forms between space and material. It forms the Universe in as much as forming stars in spheres and forming galactica in circles. Should you never have heard of these laws applying as gravity forms then also read why there is so little said about these laws? With this said I managed to prove and explain four cosmic keys that build the Universe namely: The Titius Bode Law; The Lagrangian Points, The Roche limit and Coanda Effect Everything in nature in the Universe applies these phenomena in how space forms. The Titius Bode Law: forms the solar planetary layout and annihilates Newtonian dogma that the solar system forms in any way by applying the mass of the planets. The Lagrangian Points: holds material in position to form the rings around planets. The Roche limit removes the idea that stars and planets can collide or crash into each other. This explains amongst so many other things how the Tunguska event took place. The Coanda Effect is a ratio that movement forms between space and material. It forms the Universe in as much as forming stars in spheres and forming galactica in circles. Science is blamed for many different conspiracies but those all are vague and argumentative. We all know there is something wrong within what science is and what science says. Someone is somehow hiding something somewhere and no one puts a finger on the button. All these are there to protect the mother conspiracy from getting leaked. You are about to read the mother of all the conspiracies in science, which is why science applies mind control by processing thought control. I prove that there is a mother conspiracy in place. Every conspiracy ever linked to science is in place to protect this conspiracy from becoming known. The mother conspiracy is in place so that students are brainwashed by instigating mind control on students through enforcing accepting dogma. I prove what I accuse science of. I introduce a new cosmic vision with the Universe singularity that forms every known space.

From reader reviews:

Shirley Daniels:

Hey guys, do you want to find a new book to study? Maybe the book with the headline An Open Letter to Selected Academics # 1: A Theses Introduction suitable to you? The book was written by well known writer in this era. The book entitled An Open Letter to Selected Academics # 1: A Theses Introduction is one of several books that everyone reads now. This book has inspired many people in the world. When you read this review you will enter the new way of measuring that you never knew just before. The author explained their concept in a simple way, thus all of people can easily comprehend the core of this publication. This book will give you a wide range of information about this world now. So you can see the representation of the world in this particular book.

Kevin White:

Do you really love books? If so, do you ever feel doubt if you are in the bookstore? Make an effort to pick one book that you just don't know the inside because determining a book by its cover may not work. It is a difficult job because you are afraid that the inside may not be as fantastic as the outside seems. Maybe your answer is usually An Open Letter to Selected Academics # 1: A Theses Introduction because the fantastic cover that makes you consider the content will not disappoint anyone. The inside or content is definitely as fantastic as the outside or maybe cover. Your reading sixth sense will directly make suggestions to pick up this book.

John Bennett:

Don't be worried when you are afraid that this book will fill the space in your house, you may have it in e-book technique, more simple and reachable. This specific An Open Letter to Selected Academics # 1: A Theses Introduction can give you a lot of close friends because by looking at this one book you have an issue that they don't and make you actually more like an interesting person. This kind of book can be one of a step for you to get success. This e-book offers you information that perhaps your friend doesn't learn, by knowing more than different makes you to be great people. So, why hesitate? We need to have An Open Letter to Selected Academics # 1: A Theses Introduction.

Willa Killeen:

Reading a review makes you get more knowledge from it. You can take knowledge and information from your book. Book is written or printed or outlined from each source which filled with updates of news. Within this modern era like at this point, many ways to get information are available for you. From media social similar to newspaper, magazines, science book, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just searching for the An Open Letter to Selected Academics # 1: A Theses Introduction when you need it?
