## **Get rid of warts, moles and skin tags the natural way** Olivia Barnes

Anyone who has ever been afflicted with warts will know exactly how unpleasant they can be. They are unsightly, unpleasant and can make your life a complete misery.

There are many different types of blemishes that can grow on your skin, and warts are only one of these blemishes, with others being moles and skin tags. Sometimes, warts can be painful (often depending on the area of the body where the wart is located), but any kind of skin blemish such as a wart or mole is going to be unsightly and probably embarrassing.

For anyone who has unsightly and highly visible warts or moles, they will want to have them removed. Consequently, most people who suffer from warts or a similar skin problem will visit a dermatologist in order to discuss and assess the problem. A doctor will almost certainly be able to get rid of warts or moles using various procedures (that we will briefly consider later). It may even be possible to remove them surgically, if the wart or mole problem is serious enough.

However, not everyone will be happy dealing with their wart problem by allowing them to be treated medically. Also, not everyone will be able to afford such treatment.

The good news is, you don't necessarily need medical attention or surgical assistance to get rid of a wart or mole problem, because it is possible to get rid of many unsightly skin blemishes totally naturally at home.

This book is going to focus on introducing as many different natural treatments for warts and moles as possible, because it is always preferable to use treatments which are both safe and natural for any condition or complaint you might have. Nevertheless, this does not mean that you should never seek the advice of your doctor or dermatologist, especially if you attempt to get rid of your problem naturally but the warts keep coming back or if you suspect the problem may be more serious.

You might even seek professional medical advice before attempting to use any of the natural treatments you will read of in this book, for their opinion.

However, one other significant advantage of using entirely natural methods of treatment to get rid of warts, moles or skin lesions is that while medical treatments can leave scars, using natural treatments generally means that there is no scar tissue left behind.

Let us therefore start our investigation by looking at what warts are and what causes them.
