Instrumented Spinal Fusion: Preoperative Evaluation, Indications and Techniques

Instrumented Spinal Fusion: Preoperative Evaluation, Indications and Techniques

This volume covers the indication for the use of spinal fixation, the techniques of insertion of pedicle screws, along with descriptions of the necessary anatomy of the pedicles and related parts of the vertebral body. It also provides a comprehensive review of the evaluation, indications and surgical management of spinal diseases which respond well to treatment by fusion with or without instrumentation. Health professionals treating the spine, from experienced spine surgeons to residents, should find this book a useful compendium among reference resources.
