Amir Dembo, Tadahisa Funaki

Lectures on Probability Theory and Statistics: Ecole d'Ete de Probabilites de Saint-Flour XXXIII-2003 (Lecture Notes in Mathematics, Vol. 1869) Amir Dembo, Tadahisa Funaki

This volume contains two of the three lectures that were given at the 33rd Probability Summer School in Saint-Flour (July 6-23, 2003). Amir Dembo's course is devoted to recent studies of the fractal nature of random sets, focusing on some fine properties of the sample path of random walk and Brownian motion. In particular, the cover time for Markov chains, the dimension of discrete limsup random fractals, the multi-scale truncated second moment and the Ciesielski-Taylor identities are explored. Tadahisa Funaki's course reviews recent developments of the mathematical theory on stochastic interface models, mostly on the so-called abla varphi interface model. The results are formulated as classical limit theorems in probability theory, and the text serves with good applications of basic probability techniques.

From reader reviews:

Alice Christensen:

What do you concerning book? It is not important to you? Or just adding material when you require something to explain what you problem? How about your spare time? Or are you busy man or woman? If you don't have spare time to complete others business, it gives you the sense of being bored faster. And you have free time? What did you do? Every individual has many questions above. They have to answer that question because just their can do that. It said that about book. Book is familiar on every person. Yes, it is appropriate. Because start from on kindergarten until university need this Lectures on Probability Theory and Statistics: Ecole d'Ete de Probabilites de Saint-Flour XXXIII- 2003 (Lecture Notes in Mathematics, Vol. 1869) to read.

Carol Boissonneault:

This book untitled Lectures on Probability Theory and Statistics: Ecole d'Ete de Probabilites de Saint-Flour XXXIII- 2003 (Lecture Notes in Mathematics, Vol. 1869) to be one of several books which best seller in this year, here is because when you read this guide you can get a lot of benefit on it. You will easily to buy this particular book in the book retail store or you can order it by using online. The publisher on this book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Smartphone. So there is no reason to you personally to past this e-book from your list.

Susan Rogers:

People live in this new morning of lifestyle always make an effort to and must have the free time or they will get lots of stress from both day to day life and work. So , once we ask do people have time, we will say absolutely without a doubt. People is human not a robot. Then we consult again, what kind of activity have you got when the spare time coming to a person of course your answer may unlimited right. Then ever try this one, reading textbooks. It can be your alternative throughout spending your spare time, the actual book you have read is Lectures on Probability Theory and Statistics: Ecole d'Ete de Probabilites de Saint-Flour XXXIII- 2003 (Lecture Notes in Mathematics, Vol. 1869).

Sally Kim:

Are you kind of busy person, only have 10 or 15 minute in your day time to upgrading your mind ability or thinking skill even analytical thinking? Then you have problem with the book in comparison with can satisfy your short time to read it because this all time you only find guide that need more time to be learn. Lectures on Probability Theory and Statistics: Ecole d'Ete de Probabilites de Saint-Flour XXXIII- 2003 (Lecture Notes in Mathematics, Vol. 1869) can be your answer given it can be read by anyone who have those short spare time problems.
