The TAPS-3 is a very thorough reshaping of the Test of Auditory Perceptual Skills (previously authored by M. Gardner). The most obvious change is that there are no longer two "levels" of the test - the TAPS-3 offers seamless coverage for ages 4 through 18 years. The TAPS-3 measures what a person does with what is heard, and is intended to be used along with other tests as part of a battery. It is designed to be used by speech-language pathologists, audiologists, school psychologists, and other testing professionals
