## **Atmospheric Radiation: A Primer with Illustrative Solutions (Wiley Series in Atmospheric Physics and Remote Sensing)** James A. Coakley Jr., Ping Yang

This textbook is a first-look at radiative transfer in planetary atmospheres with a particular focus on the Earth's atmosphere and climate. It covers the basics of the radiative transfer of sunlight, treating absorption and scattering, and the transfer of the thermal infrared. The examples included show how the solutions of the radiative transfer equation are used to evaluate changes in the Earth's energy budget due to changes in atmospheric composition, how these changes lead to climate change, and also how remote sensing can be used to probe the thermal structure and composition of planetary atmospheres. The examples motivate students by leading them to a better understanding of and appreciation for the computer-generated numerical results.

Aimed at upper-division undergraduates and beginning graduate students in physics and atmospheric sciences, the book is designed to cover the essence of the material in a 10-week course, while the material in the optional sections will facilitate its use at the more leisurely pace and in-depth focus of a semester course.

**From reader reviews:**

**Sandra Phillips:**

What do you think of book? It is just for students because they are still students or it for all people in the world, what the best subject for that? Only you can be answered for that query above. Every person has distinct personality and hobby for each and every other. Don't to be obligated someone or something that they don't need do that. You must know how great and also important the book Atmospheric Radiation: A Primer with Illustrative Solutions (Wiley Series in Atmospheric Physics and Remote Sensing). All type of book is it possible to see on many resources. You can look for the internet options or other social media.

**Marquita Oswald:**

What do you about book? It is not important to you? Or just adding material when you need something to explain what you problem? How about your time? Or are you busy man? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Every person has many questions above. They need to answer that question mainly because just their can do which. It said that about publication. Book is familiar in each person. Yes, it is right. Because start from on jardín de infancia until university need this particular Atmospheric Radiation: A Primer with Illustrative Solutions (Wiley Series in Atmospheric Physics and Remote Sensing) to read.

**Harriette Corwin:**

Are you kind of occupied person, only have 10 or perhaps 15 minute in your day time to upgrading your mind ability or thinking skill perhaps analytical thinking? Then you have problem with the book than can satisfy your limited time to read it because this all time you only find guide that need more time to be learn. Atmospheric Radiation: A Primer with Illustrative Solutions (Wiley Series in Atmospheric Physics and Remote Sensing) can be your answer as it can be read by you actually who have those short spare time problems.

**Brenda Moulton:**

In this age globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of references to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher in which print many kinds of book. Often the book that recommended to you is Atmospheric Radiation: A Primer with Illustrative Solutions (Wiley Series in Atmospheric Physics and Remote Sensing) this publication consist a lot of the information of the condition of this world now. This book was represented how can the world has grown up. The dialect styles that writer value to explain it is easy to understand. The actual writer made some study when he makes this book. That's why this book appropriate all of you.
