## **Broiler Signals** Koos van Middelkoop Maarten de Gussem

Broilers are fast growing animals that need constant care. There is no time for correcting mistakes; mistakes mean high costs. The prevention of mistakes is therefore crucial. Proper management starts with recognising signals in practice. For broiler-keepers, this means being alert when in the poultry house, watching and listening to the animals, paying attention to their environment and their behaviour as individuals and as a group. This usually provides important information about their animals' health, well-being and production. This information helps poultry-keepers to improve their economic results, the well-being of their animals and their own. The book Broilers follows the life cycle of these fast growing animals. Every stage is discussed separately and points out an important issue specific to that stage. The focus lays on animal-oriented procedures, thus the book is vital for poultry-keepers and anyone involved in poultry on a regular basis.
