Steven B. Krivit

Hacking the Atom: Explorations in Nuclear Research (Volume 1) Steven B. Krivit

Steven B. Krivit's *Explorations in Nuclear Research* three-book series (*Hacking the Atom*, *Fusion Fiasco*, *Lost History*) describes the emergence of a new field of science, one that bridges chemistry and physics. The books give readers an understanding of low-energy nuclear reaction (LENR) research and its history and provide a rare behind-the-scenes look at the players and personalities involved. The books present the results of in-depth historical research and draw on formerly inaccessible archives to describe what occurred in the research that has been mistakenly called "cold fusion."

Hacking the Atom, written for scientists and non-scientists alike, covers the period from 1990 to 2015 and explains how changes to atomic nuclei can occur with low-energy methods. The book reveals the hidden story of how the science initially and erroneously called "cold fusion" continued to progress slowly but incrementally after its near-death in 1989. The book shows that 100 years of chemistry and physics is not wrong but is incomplete and that there is something new and exciting in the physical sciences.

Does it all in an easy-to-follow chronology and an engaging, page-turning narrative.

From reader reviews:

Judith Joiner: The knowledge that you get from Hacking the Atom: Explorations in Nuclear Research (Volume 1) is the more deep you digging the information that hide inside words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to recognise but Hacking the Atom: Explorations in Nuclear Research (Volume 1) giving you excitement feeling of reading. The author conveys their point in particular way that can be understood through anyone who read this because the author of this publication is well-known enough. This specific book also makes your personal vocabulary increase well. It is therefore easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this kind of Hacking the Atom: Explorations in Nuclear Research (Volume 1) instantly.

Christopher Mills: In this time globalization it is important to someone to find information. The information will make a professional understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. The particular book that recommended for you is Hacking the Atom: Explorations in Nuclear Research (Volume 1) this reserve consist a lot of the information with the condition of this world now. That book was represented so why is the world has grown up. The vocabulary styles that writer use for explain it is easy to understand. Typically the writer made some research when he makes this book. This is why this book appropriate all of you.

Joseph Gee: In this era which is the greater particular person or who has ability to do something more are more special than other. Do you want to become certainly one of it? It is just simple approach to have that. What you have to do is just spending your time very little but quite enough to experience a look at some books. On the list of books in the top list in your reading list is Hacking the Atom: Explorations in Nuclear Research (Volume 1). This book that is certainly qualified as The Hungry Hills can get you closer in becoming precious person. By looking way up and review this book you can get many advantages.

Gloria Lafreniere: That publication can make you to feel relax. That book Hacking the Atom: Explorations in Nuclear Research (Volume 1) was vibrant and of course has pictures around. As we know that book Hacking the Atom: Explorations in Nuclear Research (Volume 1) has many kinds or genre. Start from kids until teens. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore, not at all of book are generally make you bored, any it offers up you feel happy, fun and relax. Try to choose the best book for you personally and try to like reading that.
