The HP Phenomenon: Innovation and Business Transformation (Stanford Business Books) Charles House, Raymond Price

The HP Phenomenon tells the story of how Hewlett-Packard innovated and transformed itself six times while most of its competitors were unable to make even one significant transformation. It describes those transformations, how they started, how they prevailed, and how the challenges along the way were overcome—reinforcing David Packard's observation that "change and conflict are the only real constants." The book also details the philosophies, practices, and organizational principles that enabled this unprecedented sequence of innovations and transformations. In so doing, the authors capture the elusive "spirit of innovation" required to fuel growth and transformation in all companies: innovation that is customer-centered, contribution-driven, and growth-focused.

The corporate ethos described in this book—with its emphasis on bottom-up innovation and sufficient flexibility to see results brought to the marketplace and brought alive inside the company—is radically different from current management "best practice." Thus, while primarily a history of Hewlett-Packard, *The HP Phenomenon* also holds profound lessons for engineers, managers, and organizational leaders hoping to transform their own organizations.

"At last! The 'HP Way, that most famous of all corporate philosophies, has taken on an almost mythical status. But how did it really work? How did it make Hewlett-Packard the fastest growing, most admired, large company of the last half-century? Now, two important figures in HP's history, Chuck House and Raymond Price, have finally given us the whole story. *The HP Phenomenon* is the book we've been waiting for: the definitive treatise on how Bill and Dave ran their legendary company, day to day and year to year. It should be a core text for generations of young entrepreneurs and managers, a roadmap to building a great enterprise."—Michael S. Malone, author of *Bill & Dave: How Hewlett and Packard Built the World's Greatest Company*

Steven Ward:

As a student exactly feel bored to reading. If their teacher requested them to go to the library or make summary for some publication, they are complained. Just little students that has reading's internal or real their interest. They just do what the educator want, like asked to go to the library. They go to at this time there but nothing reading critically. Any students feel that examining is not important, boring and also can't see colorful pics on there. Yeah, it is to get complicated. Book is very important in your case. As we know

that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this The HP Phenomenon: Innovation and Business Transformation (Stanford Business Books) can make you truly feel more interested to read.
