Correlation Pattern Recognition B. V. K. Vijaya Kumar, Abhijit Mahalanobis, Richard D. Juday

Correlation is a robust and general technique for pattern recognition and is used in many applications, such as automatic target recognition, biometric recognition and optical character recognition. The design, analysis and use of correlation pattern recognition algorithms requires background information, including linear systems theory, random variables and processes, matrix/vector methods, detection and estimation theory, digital signal processing and optical processing. This book provides a needed review of this diverse background material and develops the signal processing theory, the pattern recognition metrics, and the practical application know-how from basic premises. It shows both digital and optical implementations. It also contains technology presented by the team that developed it and includes case studies of significant interest, such as face and fingerprint recognition. Suitable for graduate students taking courses in pattern recognition theory, whilst reaching technical levels of interest to the professional practitioner.

From reader reviews:

Stephan Stephens:

The ability that you get from Correlation Pattern Recognition could be the more deep you searching the information that hide within the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to recognise but Correlation Pattern Recognition giving you enjoyment feeling of reading. The writer conveys their point in certain way that can be understood by means of anyone who read that because the author of this e-book is well-known enough. This particular book also makes your personal vocabulary increase well. So it is easy to understand then can go along with you, both in printed or e-book style are available. We recommend you for having this kind of Correlation Pattern Recognition instantly.

Joshua Johnson:

This Correlation Pattern Recognition are generally reliable for you who want to certainly be a successful person, why. The reason of this Correlation Pattern Recognition can be one of many great books you must have is definitely giving you more than just simple reading through food but feed anyone with information that possibly will shock your previous knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions at e-book and printed types. Beside that this Correlation Pattern Recognition forcing you to have an enormous of experience for instance rich vocabulary, giving you trial of critical thinking that we understand it useful in your day exercise. So , let's have it appreciate reading.

Blake Darden:

Playing with family inside a park, coming to see the coastal world or hanging out with pals is thing that usually you might have done when you have spare time, and then why you don't try factor that really opposite from that. Just one activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Correlation Pattern Recognition, it is possible to enjoy both. It is fine combination right, you still need to miss it? What kind of hang-out type is it? Oh seriously its mind hangout folks. What? Still don't buy it, oh come on its known as reading friends.

James Rohrbach:

What is your hobby? Have you heard this question when you got college students? We believe that that question was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And you know that little person such as reading or as examining become their hobby. You must know that reading is very important along with book as to be the factor. Book is important thing to add you knowledge, except your teacher or lecturer. You see good news or update regarding something by book. Many kinds of books that can you choose to adopt be your object. One of them is actually Correlation Pattern Recognition.
