Information Retrieval: Algorithms and Heuristics (The Springer International Series in Engineering and Computer Science) David A. Grossman, Ophir Frieder

Information Retrieval: Algorithms and Heuristics is a comprehensive introduction to the study of information retrieval covering both effectiveness and run-time performance. The focus of the presentation is on algorithms and heuristics used to find documents relevant to the user request and to find them fast. Through multiple examples, the most commonly used algorithms and heuristics needed are tackled. To facilitate understanding and applications, introductions to and discussions of computational linguistics, natural language processing, probability theory and library and computer science are provided. While this text focuses on algorithms and not on commercial product per se, the basic strategies used by many commercial products are described. Techniques that can be used to find information on the Web, as well as in other large information collections, are included.

This volume is an invaluable resource for researchers, practitioners, and students working in information retrieval and databases. For instructors, a set of Powerpoint slides, including speaker notes, are available online from the authors.

From reader reviews:

Karen Partain:

The book Information Retrieval: Algorithms and Heuristics (The Springer International Series in Engineering and Computer Science) give you a sense of feeling enjoy for your spare time. You may use to make your capable considerably more increase. Book can to become your best friend when you getting anxiety or having big problem using your subject. If you can make studying a book Information Retrieval: Algorithms and Heuristics (The Springer International Series in Engineering and Computer Science) for being your habit, you can get considerably more advantages, like add your capable, increase your knowledge about a few or all subjects. You are able to know everything if you like start and read a publication Information Retrieval: Algorithms and Heuristics (The Springer International Series in Engineering and Computer Science). Kinds of book are several. It means that, science book or encyclopedia or other people. So , how do you think about this guide?

Jo Lee:

The book Information Retrieval: Algorithms and Heuristics (The Springer International Series in Engineering and Computer Science) can give more knowledge and information about everything you want. So just why must we leave a good thing like a book Information Retrieval: Algorithms and Heuristics (The Springer International Series in Engineering and Computer Science)? Some of you have a different opinion about e-book. But one aim that will book can give many facts for us. It is absolutely suitable. Right now, try to closer with the book. Knowledge or data that you take for that, you are able to give for each other; you are able to share all of these. Book Information Retrieval: Algorithms and Heuristics (The Springer International Series in Engineering and Computer Science) has simple shape however, you know: it has great and large function for you. You can search the enormous world by open up and read a guide. So it is very wonderful.

Gloria Wells:

In this era globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of references to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher which print many kinds of book. Often the book that recommended to your account is Information Retrieval: Algorithms and Heuristics (The Springer International Series in Engineering and Computer Science) this publication consist a lot of the information from the condition of this world now. This particular book was represented just how can the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. The particular writer made some analysis when he makes this book. Here is why this book ideal all of you.

William Leone:

Beside this particular Information Retrieval: Algorithms and Heuristics (The Springer International Series in

Engineering and Computer Science) in your phone, it could possibly give you a way to get more close to the new knowledge or data. The information and the knowledge you can got here is fresh from the oven so don't become worry if you feel like an aged people live in narrow commune. It is good thing to have Information Retrieval: Algorithms and Heuristics (The Springer International Series in Engineering and Computer Science) because this book offers to you readable information. Do you at times have book but you would not get what it's all about. Oh come on, that would not happen if you have this within your hand. The Enjoyable option here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss the idea? Find this book as well as read it from today!
