**SuperFuel: Thorium, the Green Energy Source for the Future (MacSci)** Richard Martin

A riveting look at how an alternative source of energy is revolutionising nuclear power, promising a safe and clean future for millions, and why thorium was sidelined at the height of the Cold War

In this groundbreaking account of an energy revolution in the making, award-winning science writer Richard Martin introduces us to thorium, a radioactive element and alternative nuclear fuel that is far safer, cleaner, and more abundant than uranium.

At the dawn of the Atomic Age, thorium and uranium seemed to be in close competition as the fuel of the future. Uranium, with its ability to undergo fission and produce explosive material for atomic weapons, won out over its more pacific sister element, relegating thorium to the dustbin of science.

Now, as we grapple with the perils of nuclear energy and rogue atomic weapons, and mankind confronts the specter of global climate change, thorium is re-emerging as the overlooked energy source as a small group of activists and outsiders is working, with the help of Silicon Valley investors, to build a thorium-power industry.

In the first book mainstream book to tackle these issues, *Superfuel* is a story of rediscovery of a long lost technology that has the power to transform the world's future, and the story of the pacifists, who were sidelined in favour of atomic weapon hawks, but who can wean us off our fossil-fuel addiction and avert the risk of nuclear meltdown for ever.

### **From reader reviews:**

#### **Anna Raynor:**

The book SuperFuel: Thorium, the Green Energy Source for the Future (MacSci) gives you the sense of being enjoy for your spare time. You need to use to make your capable a lot more increase. Book can being your best friend when you getting stress or having big problem using your subject. If you can make studying a book SuperFuel: Thorium, the Green Energy Source for the Future (MacSci) for being your habit, you can get much more advantages, like add your own personal capable, increase your knowledge about many or all subjects. You could know everything if you like available and read a book SuperFuel: Thorium, the Green Energy Source for the Future (MacSci). Kinds of book are a lot of. It means that, science book or encyclopedia or some others. So , how do you think about this guide?

#### **James Haney:**

This SuperFuel: Thorium, the Green Energy Source for the Future (MacSci) book is just not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book will be information inside this book incredible fresh, you will get facts which is getting deeper you read a lot of information you will get. This SuperFuel: Thorium, the Green Energy Source for the Future (MacSci) without we realize teach the one who studying it become critical in considering and analyzing. Don't be worry SuperFuel: Thorium, the Green Energy Source for the Future (MacSci) can bring once you are and not make your carrier space or bookshelves' grow to be full because you can have it with your lovely laptop even cellphone. This SuperFuel: Thorium, the Green Energy Source for the Future (MacSci) having good arrangement in word as well as layout, so you will not experience uninterested in reading.

#### **David Shields:**

Information is provisions for individuals to get better life, information currently can get by anyone on everywhere. The information can be a know-how or any news even an issue. What people must be consider if those information which is in the former life are challenging be find than now is taking seriously which one is acceptable to believe or which one the actual resource are convinced. If you get the unstable resource then you buy it as your main information it will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take SuperFuel: Thorium, the Green Energy Source for the Future (MacSci) as your daily resource information.

#### **Allen Green:**

Reading a guide tends to be new life style within this era globalization. With examining you can get a lot of information that will give you benefit in your life. Having book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their particular reader with their story or their experience. Not only situation that share in the books. But also they write about the knowledge about something that you need example. How to get the good score toefl, or how to teach your sons or daughters,

there are many kinds of book that you can get now. The authors in this world always try to improve their expertise in writing, they also doing some research before they write for their book. One of them is this SuperFuel: Thorium, the Green Energy Source for the Future (MacSci).
