**Aspect-Oriented, Model-Driven Software Product Lines** Awais Rashid, Professor Jean-Claude Royer, Andreas Rummler

Software product lines provide a systematic means of managing variability in a suite of products. They have many benefits but there are three major barriers that can prevent them from reaching their full potential. First, there is the challenge of scale: a large number of variants may exist in a product line context and the number of interrelationships and dependencies can rise exponentially. Second, variations tend to be systemic by nature in that they affect the whole architecture of the software product line. Third, software product lines often serve different business contexts, each with its own intricacies and complexities. The AMPLE (<http://www.ample-project.net/>) approach tackles these three challenges by combining advances in aspect-oriented software development and model-driven engineering. The full suite of methods and tools that constitute this approach are discussed in detail in this edited volume and illustrated using three real-world industrial case studies.

### **From reader reviews:**

#### **Mark Frey:**

The book Aspect-Oriented, Model-Driven Software Product Lines can give more knowledge and also the precise product information about everything you want. So why must we leave the great thing like a book Aspect-Oriented, Model-Driven Software Product Lines? Some of you have a different opinion about guide. But one aim in which book can give many data for us. It is absolutely appropriate. Right now, try to closer with the book. Knowledge or info that you take for that, it is possible to give for each other; you can share all of these. Book Aspect-Oriented, Model-Driven Software Product Lines has simple shape but the truth is know: it has great and large function for you. You can search the enormous world by open and read a book. So it is very wonderful.

#### **Herbert Haubrich:**

Reading can called brain hangout, why? Because when you are reading a book especially book entitled Aspect-Oriented, Model-Driven Software Product Lines your head will drift away trough every dimension, wandering in most aspect that maybe not known for but surely can become your mind friends. Imaging every single word written in a guide then become one form conclusion and explanation that maybe you never get previous to. The Aspect-Oriented, Model-Driven Software Product Lines giving you one more experience more than blown away your mind but also giving you useful info for your better life with this era. So now let us demonstrate the relaxing pattern the following is your body and mind will probably be pleased when you are finished looking at it, like winning an activity. Do you want to try this extraordinary wasting spare time activity?

#### **Michael Jones:**

Aspect-Oriented, Model-Driven Software Product Lines can be one of your beginning books that are good idea. We all recommend that straight away because this e-book has good vocabulary which could increase your knowledge in words, easy to understand, bit entertaining however delivering the information. The author giving his/her effort to place every word into joy arrangement in writing Aspect-Oriented, Model-Driven Software Product Lines yet doesn't forget the main point, giving the reader the hottest along with based confirm resource data that maybe you can be considered one of it. This great information could drawn you into completely new stage of crucial imagining.

#### **Larry Pulido:**

Your reading sixth sense will not betray you, why because this Aspect-Oriented, Model-Driven Software Product Lines book written by well-known writer who really knows well how to make book that may be understand by anyone who else read the book. Written throughout good manner for you, still dripping wet every ideas and writing skill only for eliminate your current hunger then you still hesitation Aspect-Oriented, Model-Driven Software Product Lines as good book not only by the cover but also with the content. This is

one book that can break don't judge book by its handle, so do you still needing yet another sixth sense to pick this specific!? Oh come on your looking at sixth sense already alerted you so why you have to listening to a different sixth sense.
